COMPANY OVERVIEW

Fresh Haystack, a division of CANDA, is a seamless and modular case management solution that was born out of years of experience in working with a multitude of enterprise solutions that were expensive, difficult to navigate, costly and slow to implement. With a dedication to 'getting things done,' we knew there had to be a better way.

CANDA provides services and solutions that offer breakthrough agility with focus on development and delivery processes that are dynamically updated, modular and secure. Our work includes vast experience and a proven history in the government marketplace and Fortune 500 companies.
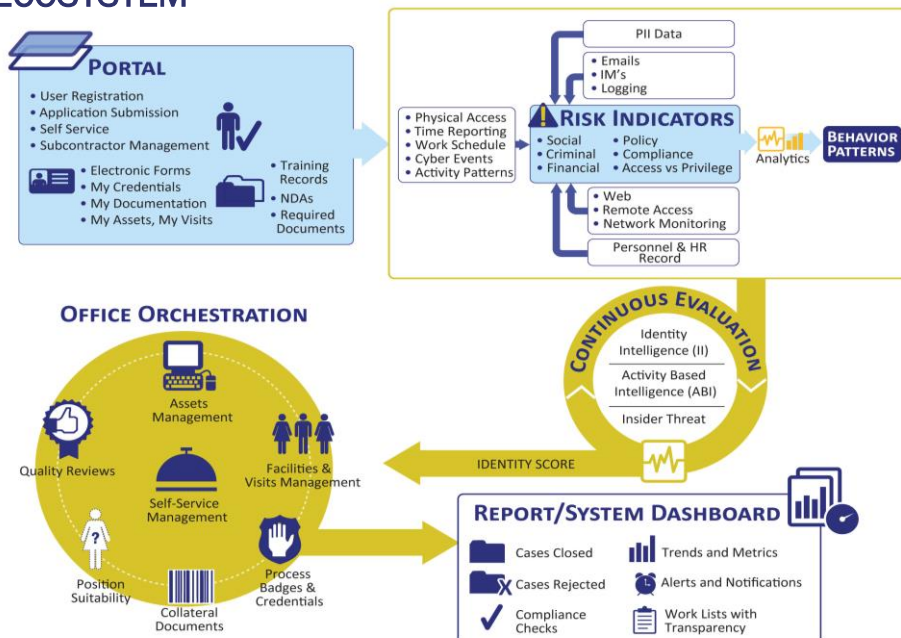

CAPABILITIES

- Case Management Solutions
- Continuous Evaluation & Insider Threat
- Personnel Security Solutions
- Risk / Threat Assessments
- Background Investigations Management

HOW WE MAKE A DIFFERENCE

We have experience with stepping in tough, sinking projects, disjointed IT organizations, with customer service concerns, multiple priorities and making them not only success but also referenceable accounts. And we do it consistently on time and budget.

ECOSYSTEM

SOLUTION

Personnel Security, Cyber and Insider Threats are not separate risks that can be effectively monitored independently. In our modern world, these three risks are interconnected and must be addressed with a process that integrates each risk into a centralized operating picture of your Enterprise's overall security.
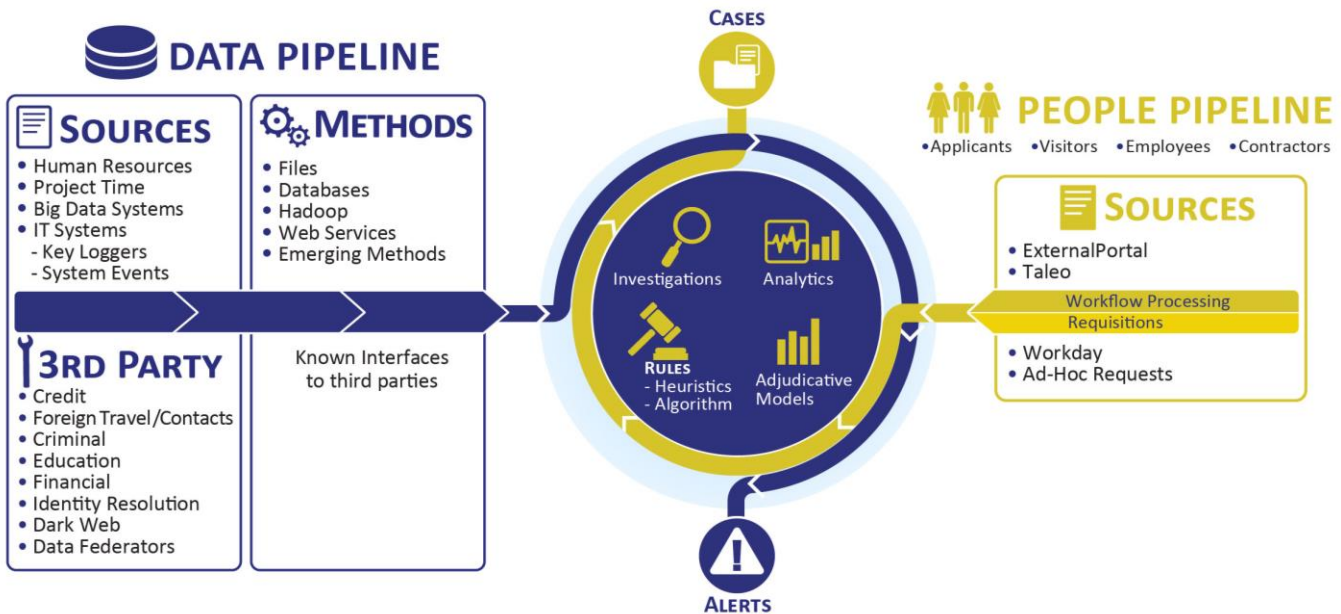

Failure to integrate your risks can have disastrous consequences. Analyzing your risks in isolated silos deprive your enterprise of the powerful contextual insights provided by integrated risk assessment and can result in *Edward Snowden*-like disasters. Your Enterprise's Risk Assessment must leverage the inter-dependencies between your security and other internal systems. Only then can your risk assessment be fully understood across your enterprise by coordinating with your Security, IT, Legal and Human Resources (HR).

Fresh Haystack is an innovative risk assessment offering that provides an end-to-end solution which places all elements of risk assessment into a single contextual, easy to use and configure, proactive platform. Fresh Haystack improves operational efficiency by integrating your enterprises risks into a centralized operating picture while complying with your organization's regulations, standards, and allows to review all risks related data discoveries and reporting while respecting employers privacy guidelines and procedures.

Fresh Haystack not only addresses your current challenges in risk assessment, but actively anticipates the evolving complexity of the security industry and leverages technologies designed to adapt to the growing demands placed on security and compliance in the Risk / Threat Assessment market. Undoubtedly, exponential growth of compliance requirements, cyber-attacks on the IP, and corporate and consumer data losses will result in the need to process great volumes of heterogeneous data from the diverse systems while maintaining sustainability, security and proper levels of access control. Fresh Haystack is prepared to assist your crucial security needs as they confront an ever-changing array of threats.

VISION

EXPERIENCE

Our organizational experience operating systems across the United States Government and Fortune 500 companies provide us the competence to provide seamless, and uninterrupted, service to your organization. Additionally, our professionals have worked with clients across both Government and Private Industry to avoid and anticipate intrusions and leakages. We specialize in managed cloud services that offer seamless and cost-effective services delivered on time and budget. Our consulting experts assist businesses with process optimization by lining, merging and organizing key systems and players.

We help to rationalize interactions between systems and people, introducing solutions to minimize risks, increase robustness and reach new operation efficiency levels. Our familiarity with all major enterprise and hardware / software solutions enables us to guide our clients though carefully designed phased strategic approach to improve operations, yielding a reduction in costs while paving the way for the future growth.

We live and work in age of increasing complexity and security measures. Rise of the social media, cyber threats for digital predators and other security concerns are increasing the risk of organizations and government agencies with managing their personnel. As these risks compound our clients are confronted with frequent requests from regulators and changing policies. We understand the risks and the complexities. Our team never rests ensuring that we operate world-class technology infrastructure, thereby ensuring security, improving your profitability, and your efficiency. We are alert, responsive and supportive of every customer achieving their ultimate goal of peak efficiency, minimum down times and maximum level of customer satisfaction.
