

COMPANY OVERVIEW

Fresh Haystack, a division of CANDAs Solutions, is a modular case management solution created from years of experience deploying generic case management systems that were expensive, difficult to navigate, costly, and slow to implement. With a dedication to “Getting Things Done,” we knew there had to be a better way to gain clarity across the many existing departmental data silos.

CAPABILITIES

- Case Management Solutions
- Enterprise Industrial Security
- Enterprise Personnel Security
- Enterprise Investigations Management
- Enterprise Workforce Risk Management
 - ▶ Risk / Threat Assessments
 - ▶ Continuous Evaluation
 - ▶ Insider Threat
 - ▶ CounterIntelligence

ABOUT CANDAs

CANDAs provides Workforce Risk Management solutions that enable whole-person, contextual visibility and threat mitigation opportunities. Our public and private sector work experience positions us to support the missions of the Warfighter, the National Security workforce, and Corporate entities.

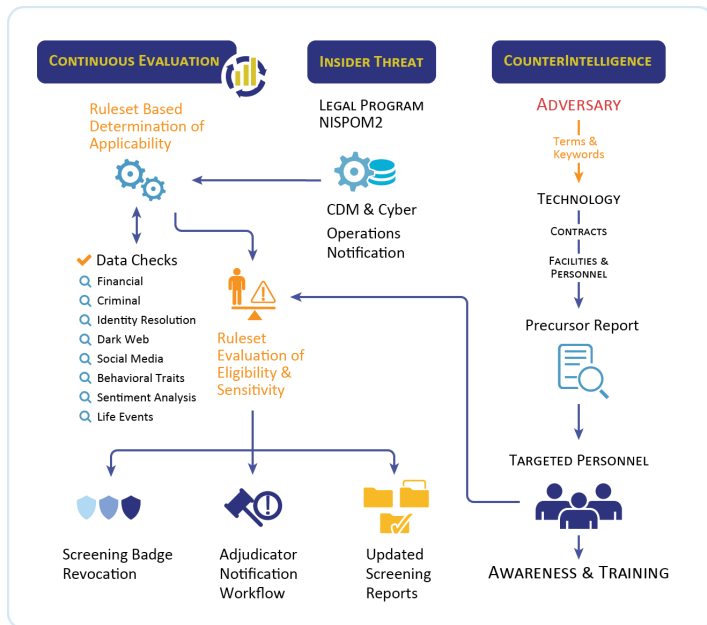

HOW WE MAKE A DIFFERENCE

CANDAs has deep security domain experience which enables up-to-date alignment of policy and software, keeping our customers on the forefront of the latest risk mitigation methods and techniques. We provide a way to analyze, process, adjudicate, store, and trend information of interest in a safe and secure manner.

BENEFITS

 - ▶ *Corporate Brand*
 - ▶ *Intellectual Property*
 - ▶ *Trade Secrets*
 - ▶ *Legal Liabilities*
 - ▶ *Data Leaks*
 - ▶ *Proprietary Assets*
- *Compliance*
- *Privacy*
- *Configurable Risk Model*
- *Behavioral Analytics*
- *Federated Data Providers*
- *Cloud-based*
- *Security as a Service*
- *ROI*
- *Flexible Licensing*

ENTERPRISE WORKFORCE RISK MANAGEMENT

Personnel, Cyber, and Insider Threats are not separate risks that can be effectively monitored independently. In our modern world, these risks are interconnected and must be addressed with a method that integrates each risk into a centralized operating picture of your Enterprise's overall security.

Failure to integrate risks can have disastrous consequences. Analyzing risk in isolated silos deprives your Enterprise of the powerful, contextual insights provided by integrated risk assessment and can result in *Edward Snowden*-like disasters.

Enterprise Risk Assessment must leverage the interdependencies between security and other internal systems. Only then can true risks be fully understood across the Enterprise by coordinating with Security, IT, Legal, and Human Resources.

Fresh Haystack is an innovative Enterprise Workforce Risk Management end-to-end solution that places all elements of security risk into a single, contextual, easy-to-use platform. Fresh Haystack improves risk mitigation effectiveness by integrating the Enterprise's risk into a centralized operating picture while complying with organizational regulations and standards. It allows a review of all risk-related data discoveries and reporting, all while respecting employees' privacy guidelines and procedures.

Fresh Haystack not only addresses current challenges in risk assessment, but it also actively anticipates the evolving complexity of the security industry and leverages technologies designed to adapt to the growing demands placed on your Enterprise. Undoubtedly, exponential growth of compliance requirements, cyber-attacks on the IP, and corporate / consumer data losses will result in the need to process large volumes of heterogeneous data from diverse systems; all while maintaining sustainability, security, and the proper levels of access control. Fresh Haystack was purpose built to assist your crucial security needs as you confront and ever-changing array of threats.
