

COMPANY OVERVIEW

Fresh Haystack, a division of CANDA Solutions, is a modular security case management solution created from years of experience deploying generic case management systems for Federal and Commercial customers that were expensive, difficult to navigate, costly, and slow to implement. With a dedication to “Getting Things Done,” we knew there had to be a better way to gain clarity across the many existing departmental data silos.

CAPABILITIES

- Enterprise Workforce Risk Management
 - ▶ Risk / Threat Assessments
 - ▶ Continuous Evaluation
 - ▶ Insider Threat
 - ▶ CounterIntelligence
- Enterprise Industrial Security
- Enterprise Personnel Security
- Enterprise Investigations Management
- Case Management Solutions

 - ▶ *Data Leaks*
 - ▶ *Proprietary Assets*
- *Compliance*
- *Privacy*
- *Configurable Risk Model*
- *Behavioral Analytics*
- *Federated Data Providers*
- *Cloud-based*
- *Security as a Service*
- *ROI*
- *Flexible Licensing*

ENTERPRISE WORKFORCE RISK MANAGEMENT

Failure to integrate Personnel, Cyber, & Insider Threat risks can have disastrous consequences. Analyzing risk in isolated silos deprives your Enterprise of the powerful, contextual insights provided by integrated risk assessment and can result in *Edward Snowden*-like disasters.

Enterprise Risk Assessment must leverage the interdependencies between security and other internal systems. Only then can true risks be fully understood across the Enterprise by coordinating with Security, IT, Legal, Recruiting, and Human Resources.

Fresh Haystack Enterprise Workforce Risk Management (**EWRM**) is an innovative end-to-end solution that places all elements of security risk into a single, contextual, easy-to-use platform. EWRM improves risk mitigation effectiveness by integrating the Enterprise' risk into a centralized operating picture while complying with organizational policies, regulations, and standards. It allows a review of all risk-related data discoveries and reporting, all while respecting employees' privacy guidelines and procedures.

EWRM not only addresses current challenges in risk assessment, but it also actively anticipates the evolving complexity of the security industry and leverages technologies designed to adapt to the growing threats placed on your Enterprise. Undoubtedly, exponential growth of compliance requirements, cyber-attacks on the IP, and corporate / consumer data losses will result in the need to process large volumes of data from diverse systems. EWRM was purpose built to assist your crucial security needs as you confront an ever-changing array of threats.
