

ENTERPRISE CAPABILITIES

Fresh Haystack, a division of CANDA Solutions, is a modular security case management solution created from years of experience deploying generic case management systems for Federal and Commercial customers that were expensive, difficult to navigate, hard to customize, and slow to implement. With a dedication to “Getting Things Done,” we knew there had to be a better way to gain clarity across the many existing departmental data silos using case management framework.

CAPABILITIES

- Enterprise Industrial Security
- Insider Threat Defense
 - ▶ Risk / Threat Assessments
 - ▶ Continuous Vetting / Evaluation
 - ▶ Insider Threat
 - ▶ CounterIntelligence
- Continuous Adaptive Risk Evaluation
- Enterprise Personnel Security
- Enterprise Investigations Management
- Case Management Solutions

ABOUT CANDA Solutions

CANDA provides Enterprise Risk Management solutions that enable whole-person, contextual visibility and threat mitigation opportunities. Our public and private sector work experience positions us to support the missions of the Warfighter, the National Security workforce, and Corporate entities.

HOW WE MAKE A DIFFERENCE

CANDA has deep security domain experience which enables up-to-date alignment of policy and software, keeping our customers on the forefront of the latest risk mitigation methods and techniques. We provide a way to analyze, process, adjudicate, store, and trend information of interest in a safe and secure manner.

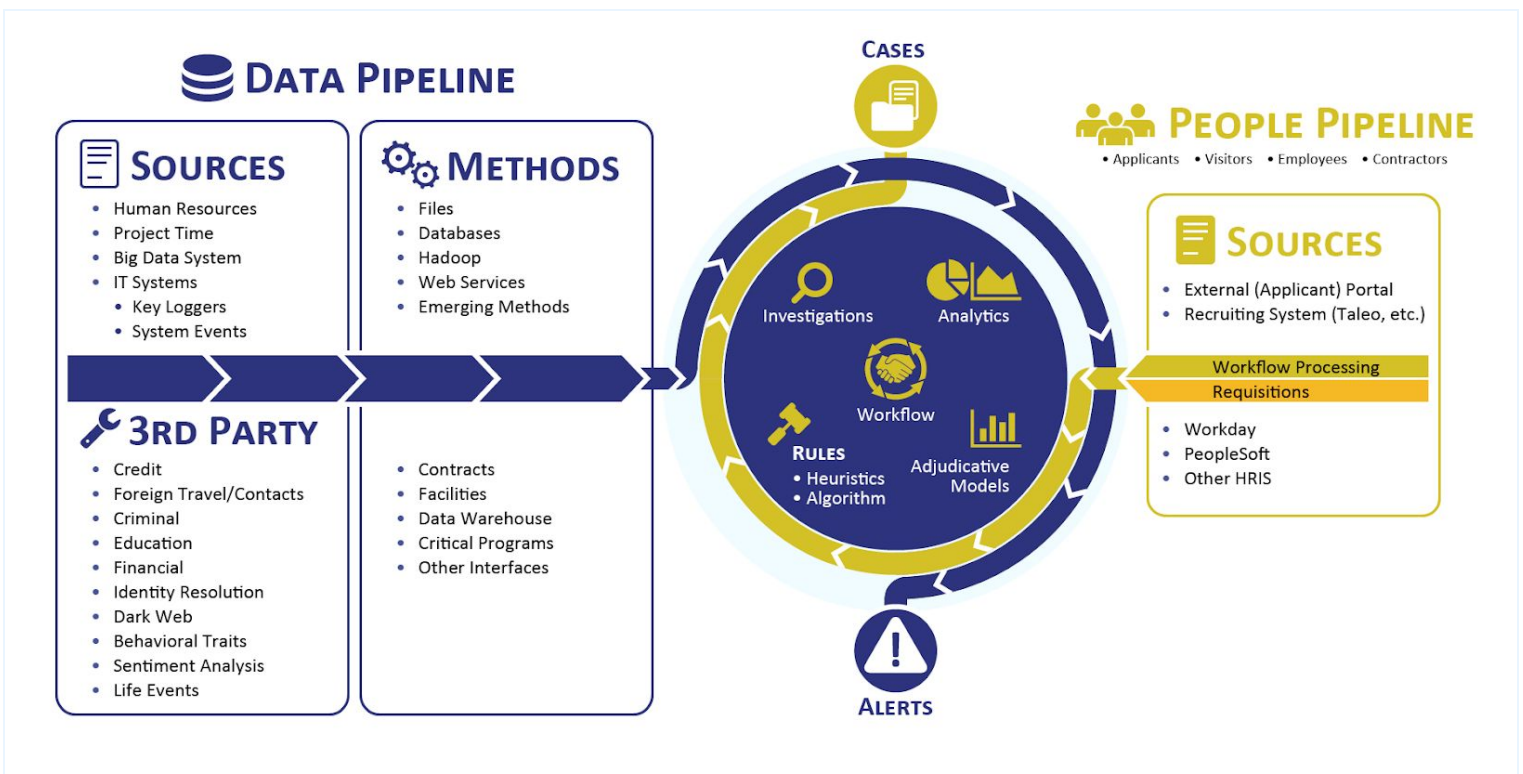

OUR PROCESS

We use the same ‘**FARM**’ methodology in all that we do, from working with multi-agency initiatives, to the detailed and intricate challenges brought on by today’s changing and evolving workforce, we realize that you need a common approach to ensure mission success. Our FARM process - **Fresh** approach to Agile, **Alignment** of business drivers, stakeholder needs and priorities and outcomes, driving **Results** with our focus on client requirements, needs and priorities, and always with our inherent focus on a **Managed Approach**, has resulted in proven success, time and time again.

Fresh Haystack helps to bring competing priorities and chaotic processes to order and alignment. We empower the customer, drop cycle time, cut costs, increase quality, and deliver better overall IT products. The result? Our work turns the course of challenges and embraces all priorities to increase productivity at least by 60% in the first year alone while adapting to always-changing requirements and policies.

Fresh Haystack was developed specifically for the Security Clearance domain with focus on bringing precision, accuracy, and acceleration to the paper-bound processes of Collateral, SCI, and Public Trust Security. Our ultimate goal is to revolutionize the Personnel Security software and automate the full lifecycle of security clearance processing.

Fresh Haystack is the only product on the market today addressing the end-to-end lifecycle of the Enterprise Industrial and Personnel Security. Our platform combines Suitability and Public Trust, Collateral & SCI Security, Network & Cyber Security, Insider Threat Defense with Continuous Vetting and Evaluation, CounterIntelligence, and Investigations Management on any device. Fresh Haystack is a true, single platform to secure the entire personnel lifecycle.
