

ENTERPRISE PERSONNEL SECURITY

Fresh Haystack, a division of CANDA Solutions, is a modular security case management solution created from years of experience deploying generic case management systems for Federal and Commercial customers that were expensive, difficult to navigate, costly, and slow to implement. With a dedication to “Getting Things Done,” we knew there had to be a better way to gain clarity across the many existing departmental data silos using case management framework.

Fresh Haystack is a “game-changer”, as some of our clients have described it post implementation. A comprehensive, logically structured, user friendly case management system, Fresh Haystack is a paperless, workflow-based and automated Case Management solution built for the specific purpose of streamlining the complex Industrial Security management process. Fresh Haystack was built to cut cost, increase efficiency, and deliver visibility into the security clearance process.

The continual changes to the security requirements are driven by the challenges in our economic landscape, the ever-present threats to our National Security, and the evolving complexity of Human Resource capital. These security requirements dramatically impact business resources, with executives and managers seeking operationally relevant tools to balance business and talent requirements, gain efficiency, lower costs, and increase quality.

Fresh Haystack is the only product on the market today addressing the end-to-end lifecycle of the Enterprise Industrial and Personnel Security. Our platform combines Suitability and Public Trust, Collateral & SCI Security, Network & Cyber Security, Insider Threat Defense with Continuous Vetting and Evaluation, CounterIntelligence, and Investigations Management on any device. Fresh Haystack is a true, single platform to secure the entire personnel lifecycle.
